EDUCATION

North Carolina A&T State University
B.A., Business Administration
Minor in Psychology

AI transformation and product leader building AI-enabled tools and workflows that simplify work. Identifies business needs, translates them into product requirements, builds digital solutions, and leads pilots and adoption across enterprise teams. Experience includes 10+ AI and transformation initiatives, workflow automation, and employee products built to scale across large organizations.

EXPERIENCE

Sam's Club
2025 - Present
Associate Experience Manager

- Conceived, designed, and built Belonging Builder, an AI-enabled tool featured on Walmart's enterprise Belonging page. It provides personalized guidance, resources, tools, and actionable suggestions to help associates and leaders foster connection and belonging. Lead product strategy and the pilot. The tool is accessible to about 1.5 million associates.
- Support teams in identifying needs and opportunities for AI by assessing where processes can be streamlined, translating needs into product requirements, and recommending or building AI-enabled solutions across 10+ products and transformation initiatives.
- Built an AI-enabled communications workflow that turns source inputs into PowerPoint decks and Outlook-ready HTML in minutes, replacing a roughly 35-step manual process that took days while retaining a review step.
- Designed and built an AI-enabled club health tool that equips executives, leaders, and market people partners with pre-visit insights, highlighting weak points and areas of opportunity so they can focus club tours and determine where support is needed most.
- Provided 1:1 AI coaching to associates and executives and led AI sessions at team offsites, training cohorts, foundational AI and prompt-engineering sessions, demonstrations, and a capstone showcase for audiences of up to 1,000 associates.

Walker Studio
2025 - Present
Freelance Digital Solutions Builder

- Design and build websites, AI agents, and digital experiences for small businesses and community organizations using Cursor and Replit.
- Develop workflow automations that streamline information sharing, website updates, and content management for clients.

Walmart Global People
2022 - 2025
Senior Analyst, People (2023-2025) | Global People Intern (Summer 2022)

- Designed and launched the Global People Hub, centralizing onboarding, learning, communications, and self-service resources for more than 1,750 associates.
- Redesigned the Associate Discount Card experience using user-centered design, reducing related support inquiries by 30% through clearer communication and process visibility.
- Completed a two-year People rotational program across talent, organization design, people strategy, and workforce planning.

Apple
2020 - 2022
iOS & Mac Technical Advisor

- Resolved complex technical issues through consultative problem-solving while consistently achieving strong customer satisfaction and service performance results.
